To whom it may concern:

I am writing on behalf of Bilcor, Inc. and Ed Wong. Bilcor has been performing all of the Life Safety work and FLS testing and we couldn't be happier. They have been our vendor since 2012 taking over from the now defunct Carter Brothers. We are in the last stage of completing our process in converting all our commercial floors into the new system. They have performed a seamless transition in converting our Life Safety panel from the original 6500 panel to the new programmable EST-3 System.

They are always responsive, professional and independently hard workers without needing to be constantly supervised by our engineers which allows my team to concentrate on their job. Bilcor working closely with CBF electric to complete all of the electrical portion of the project is a seamless transition. We are replacing all the devices throughout the building and have never had any issues or time delays with getting any parts, boards, programming etc.

Nathan Stahl our Chief Engineer have referred Bilcor to two other Class 1A building in San Francisco that were having troubles with their current Life Safety vendor. After using them on a small Tenant Improvement projects, they were so impressed and they are now their full time Life Safety and FLS testing vendor.

I know they would be an excellent fit for your organization. If you have any questions, feel free to contact me at the above address.

Best,
Dominic Canicosa
